Introduction

Thank you for purchasing *Add and Subtract with Maxwell Mouse*. I hope it provides your students with a fun, hands-on way to learn and practice math facts.

What's Included in This Pack:

- Introduction
- Instructions for assembly
- Ten frames
- Counters
- Addition practice mat
- Subtraction practice mat
- Number cards (number on cheese)
- Answer cards (number on cheese with mouse)
- Practice cards (blue)
- Answer cards (blue)
- Answer keys

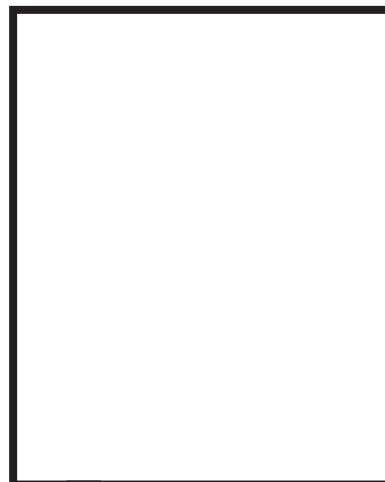

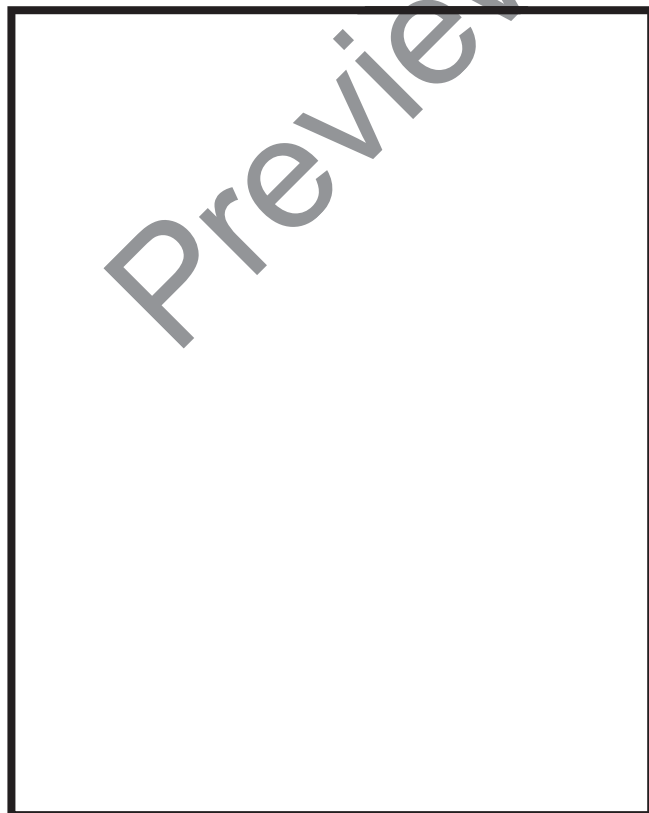

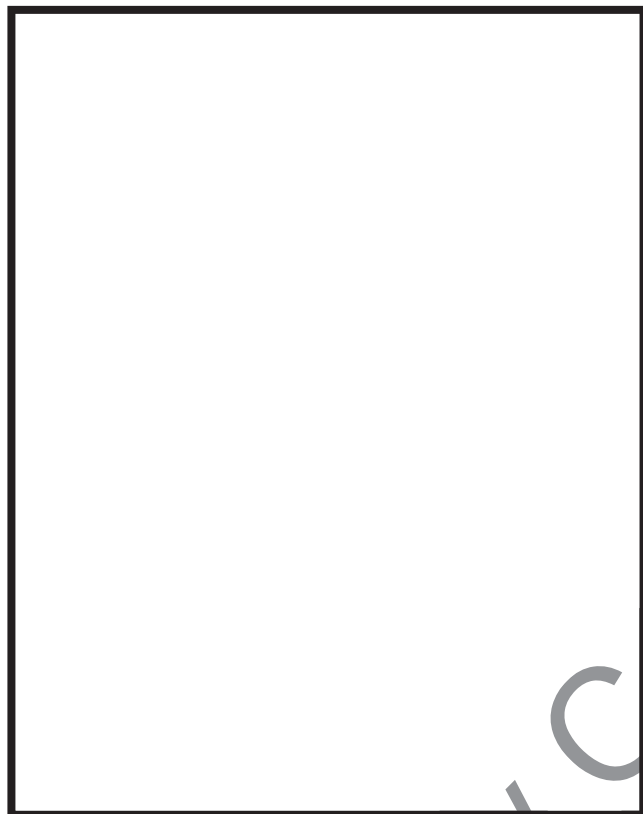

Suggestions for Use:

- The counters can be used with the ten frames to teach addition facts that add up to ten. Use two ten frames to teach facts up to twenty.
- Use the practice mats, counters, number cards, and answer cards to introduce children to adding and subtracting concepts. Have the children use the number cards to create number problems, i.e. $3 + 1$. Then have them use the counters to solve the problems, i.e. put 3 counters in the first box and 1 counter in the second box. Once they have the answer, they can put the answer card in the box after the equals sign.
- The blue practice and answer cards can be used for creating math centers, learning trays, or in pocket charts. Simply put the practice cards and their appropriate answer cards in an envelope for practice. For example, if you wanted a +2's math center, you would put in all practice cards with this format: # + 2, plus the corresponding answer cards. Answer keys can be kept in a separate place for checking. Additionally, these practice and answer cards can also be used to demonstrate and practice fact families.
