

50 States Flash Cards

Introduction

The *50 States Flash Cards* are designed to help children learn the 50 U.S. states through the use of flash cards, activities, and games. You'll find two pages of activities that use the flash cards on the following pages. Some can be played solo while others are for groups of two or more people. Also included are instructions for assembling the flash cards in multiple ways. Note that for some of the activities, you will need a set of flash cards that are printed on individual pages rather than back-to-back as described in the instructions
