

# The Alphabet Train Train Track Letter Mats

Children can practice letter formation by tracing the train track letters with a toy train engine or the printable Alphabet Train included on this page.

### How to Make

To make the letter mats, print the pages found in the other two documents of this product on paper and laminate, or print on card stock and laminate if desired.

To make the Alphabet Train engine, print this page on card stock. Cut out the train piece. Fold in on one of the blue lines so that the unprinted side touches the unprinted side. Unfold this and do the same on the other blue line. Unfold that. Fold the opposite way on the two red lines so that the printed sides touch the printed sides. If you hold the two engines together back to back, you can see how the Alphabet Train piece will stand up on the base bottom. To finish it, glue the base tops to the base bottom and glue the two engines back to back. You may need to use paper clips to hold it together until it dries.

### How to Use

Let the children trace the letters with a toy train engine or the printable Alphabet Train included in this product..
